Re: CMA Price Increase

CMA Dishmachines would like to thank you for being a valued partner and working with us through this difficult year. We at CMA continue to look for ways to improve our products, reduce costs and to service our customers better.

Unfortunately, due to rising costs for materials, components, labor and freight, CMA has found it necessary to increase dish machines, accessories and parts prices by approximately 4.5 percent effective February 16, 2026. Orders that have already been placed and are scheduled to be shipped will not receive an increase.

We are letting you know in advance to prepare for the necessary actions required of you. A new price list will be available soon.

CMA is appreciative of the opportunity to participate in doing business together and want to express our gratitude to you

Sincerely,

A handwritten signature in black ink, appearing to read "Chris Arnette".
