May 1, 2026

Dear Middleby Partners,

Over the past year, we have worked hard to maintain pricing stability while navigating rising costs across our supply chain. In particular, escalating freight expenses and ongoing shifts in global market dynamics have continued to place pressure on overall input costs. Through operational efficiencies and the strength of our global network, we have absorbed as much of these increases as possible to support your business. However, these pressures have reached a point where a pricing adjustment is necessary.

Effective August 1, 2026, Middleby will implement a price increase across our commercial foodservice brands. We will communicate the specific percentage range in the coming weeks following completion of our full-year cost review.

To assist with planning, current pricing will be honored for orders received on or before July 31, 2026, with shipments scheduled no later than August 31, 2026.

We remain committed to delivering the quality, innovation, and service you expect, and to supporting your continued success.

Thank you for your partnership. Please reach out with any questions.

Best regards,
