Subject: September 1, 2026 Scotsman Price List Announcement – Parts and Equipment

Scotsman is publishing an updated commercial equipment and parts price list effective September 1st, 2026. For equipment and accessories, the aggregate adjustment is approximately 3% with some variations across the product categories. The parts adjustment will be approximately 4% with some variations throughout the offering.

The ice machine market continues to be dynamic, with tariffs, material costs, component availability, freight, and global supply chain variability affecting both domestic and international sourcing. Scotsman has worked to absorb and offset a meaningful portion of these pressures through ongoing investment in our South Carolina manufacturing facility, disciplined sourcing actions, the support of our manufacturing footprint in Italy and China, and the broader purchasing scale available through the Ali Group.

At the same time, we remain focused on helping you compete and serve your customers with confidence. Scotsman continues to offer one of the industry's broadest ice machine portfolios, backed by field-tested technology, reliable product performance, and an experienced customer relations, technical service, and distribution network that supports our products throughout their lifecycle.

We recognize that pricing changes require advance notice and clear planning windows. A detailed equipment and parts price list will be provided by July 31st. Orders placed for immediate shipment before September 1st, 2026, will be honored at current pricing. Pricing on existing quotes will also be honored, provided the applicable items ship before October 1st, 2026.

If you have questions, please contact your Scotsman Sales Manager or Scotsman Customer Relations team. Thank you for your continued partnership and for the trust you place in Scotsman.

Sincerely,
