To Our Valued Partners,

RE: Notice of Upcoming Price Adjustment

First and foremost, we would like to express our sincere gratitude for your continued partnership and support of Turbo Air.

It is with deep regret that we must inform you of a necessary price adjustment due to circumstances beyond our control. Despite the imposition of government tariffs, we have made every effort to avoid passing these additional costs on to our customers. However, the financial burden has now reached an unsustainable level.

In particular, a 50% tariff has been imposed on our primary materials- aluminum and stainless steel-along with additional tariffs ranging from 20% to 55% on products manufactured at our overseas facilities. These cumulative costs have made it extremely difficult to maintain our current pricing structure without compromising the quality and service the Turbo Air brand.

Therefore, in order to continue delivering the high standards you expect from Turbo Air, effective **September 1, 2025**; we are implementing a modest price increase as outlined below. We kindly ask for your understanding and cooperation during this challenging period.

- Super Deluxe (SD) Series: +5%
- M3 Series: +6%
- Model X Series: No change (0%)
- BTI: +5%
- Refrigeration Systems: +5%

We greatly appreciate your partnership and look forward to continuing our successful partnership.

Warm regards,

Brian S. Kim
Chief Engineering & Executive Officer
