

DATE: January 15, 2026
TO: Authorized Vulcan Dealers
FROM: Gary Simpson, Senior Vice President, US Sales
SUBJECT: Price Adjustments - Effective MARCH 15, 2026

Valued Dealers –

The foodservice equipment industry continues to face significant cost pressures from ongoing tariff activities and inflation. In this environment, Vulcan is taking deliberate steps to mitigate the impact of these challenges and reduce their effect on the prices we extend to our dealers and end-user customers. At the same time, we remain focused on maintaining reliable product availability so our partners can plan with confidence, and our end-users can depend on consistent performance.

Vulcan announces the following price increase effective March 15, 2026: all Vulcan Chef'sCombi equipment devices and accessories will go up by 9.0%.

Also effective on March 15, 2026 is the resumption of UMRP prices on Vulcan and Wolf Economy Products (Vulcan SX, LG, VEG, 1GR, VCR Line, VICM, VSP, 10XX Cheesemelters and Wolf WF, WSP, WICM, WX).

Updated price lists will be published during the week of February 2, 2026.

We appreciate your support and look forward to continued opportunities to serve you at the highest level.

Best Regards,
